A DARK ROMANTASY OF SHAPESHIFTER ASSASSINS

Steal the ledger that owns every odiyan, or die as the guild's property.

Neela is a leopard-shifting assassin with two smears of resin left, a crown price on her head, and a husband she was once paid to kill. Devan, the warden she was sold to, has stood between her and every blade since their wedding night. Now the monsoon has sealed the passes, the guild is hunting her, and a crown justice has arrived at his gate with a warrant.

Together they plan to rob the Resin House. Devan needs one contract to prove his sister's murder. Neela wants every page returned to the hand it names. Both plans go through the same door.

The man who could cage her with one spoken word has sworn never to say it. Their wounds are shared, their bargain is written in the dark, and the first contract Neela reads aloud will name the part she played in his sister's death.

The ledger can free forty lives or make her the master Chathu was.

Can they steal it without becoming its new masters?

Oath of Claws is book 2 of The Odiyan Contracts: an arranged marriage turned real, a heist in the monsoon rains, and shared wounds that make every fight a risk for both. Open-door heat, dark edges, and a hopeful ending. Start with Vow of Teeth for the full story.
